

MD2000 Pastaloop PVC Primary entrance matting

Heavy-duty resilient PVC loops provide an ideal scraper entrance matting floor mat with a fall through effect for Matwell applications, which holds a high volume of grit and moisture whilst creating a clean surface to minimise re tracking.

Manufactured to ISO9002 Pastaloop is a cost effective primary entrance door matting system, completely weather proof, may be used indoors or outdoors.

The un-backed version is ideal in matwells or may be surface mounted using the backed version.

Economical Pastaloop PVC contract entrance matting system for use in public entranceways, wet areas, changing rooms etc.

Performance

Pastaloop entrance matting has outstanding soil retention due to its ability to hold a large volume of grit.

Constant cleaning action as debris and moisture is held within the loops.

Pastaloop is available in six colours in backed and un-backed versions.

Colours: Red, Grey, Blue, Black, Green, Brown

Construction

Soft PVC loops fused together to create a fall through effect scraper entrance mat.
